

Hertel: the industrial landscape

City of Buffalo 2026-2027 assessment parcels / numbered properties indexed on page 2

Recorded land use

- Industrial
- Vacant
- Mixed use
- Commercial
- Residential
- Community Service
- Parks/Recreation
- Transport / utility

48 numbered parcels: selected for industrial, logistics, repair, vacancy and reuse reporting. All visible parcels are coloured; unnumbered parcels are context. Numbers are map references, not a walking sequence. Leaders point to parcel centroids, not entrances.

Read carefully: recorded land use is an assessment classification, not a verified current tenant or activity. Pink denotes the city's vacant class, not a field-confirmed empty lot. Dark outlines identify indexed parcels. Dashed lines show county railroad geometry, not confirmed operating tracks.

Method: index is a purposeful selection, not a complete industrial-business inventory. Property class, owner and SBL are reproduced from the city parcel service; owner is not necessarily operator. Class descriptions are shortened for readability. The source misspelling "Commercial" is displayed as "Commercial".

1803 Elmwood: its numbered outline shows the entire tax parcel. DEC site C915394 is a smaller cleanup area; no DEC boundary is drawn here. It lies south of Hertel, correcting the northward walking suggestion in the earlier field pack.
